

26-04-2012 Showing 1 of 1 books by our members Books by Our MembersQ: c# regex problem I need to write a regex to find substring match, so I have this: `string queryString = "ipadd=192.168.0.20:001"; string testTarget = "192.168.0.20:001"; string queryStringFind = "ipadd="; string testTargetFind = "192.168.0.20"; Regex query = new Regex(queryStringFind); Regex test = new Regex(testTargetFind);` What I expect is : If both string are equal, the code will return true. What actually happens is : test always return false. What's wrong with my code? Thanks. A: Why wouldn't you use a `string.IndexOf()` here? A: Just use `IndexOf` to see if the test string has the same chars as the query string.

Sheila Wray Gregoire Sheila Wray Gregoire is an American executive, journalist, and author. She has served as executive director of the Center for Investigative Reporting, the largest investigative reporting news organization in the U.S., and its Pacific News Service. She is a contributor to the Capital Public Radio Program *State of Inequality*. Early life and education Gregoire was born in San Francisco, California.
